

Experience	Emergent Emergent Product Designer Internship (July 2026 - Present) Contributed to Emergent's Builders' Contests across multiple global phases, designing product experiences and campaign assets for contests featuring Raj Shamani and Fabrizio, followed by country-level build contests across Canada, France, Turkey, and Indonesia. Contributed to Emergent's design system by streamlining UI patterns, improving consistency across product experiences, and establishing scalable design practices.	
	 EULER Euler Motors UX Designer Internship (December 2025 - June 2026) At Euler Motors, I contributed to Chimera, a next-generation infotainment and HMI system for commercial EV drivers in India. I worked on ergonomic studies, driver research, and designing low-distraction interfaces for navigation, vehicle health, media, and safety alerts. The project helped me gain hands-on experience in automotive UX, HMI principles, and safety-focused interaction design	
	 Cardtree Product Designer Internship (Aug 2025 - Oct 2025) Designed and shipped multiple new widgets, including the AI Twin experience, while refining legacy components to create a cohesive and scalable product. I built a unified brand identity, standardized interaction patterns, and strengthened design-dev collaboration and ensuring the product was polished and market-ready for launch	
	Peelmint User Experience Designer Internship (May 2025 - July 2025) Contributed to Peelmint (Design Division) by leading UX audits, design reviews, and responsive web projects for multiple clients. Helped design and optimize websites for SAOX, Peelmint, and 1561 Media, while improving internal design systems and workflows for greater consistency and efficiency.	
Projects	Improving metro experience for Pregnant Ladies Course Work March 2025 Redesigned metro seating for pregnant women, seniors, and disabled individuals with ergonomic comfort, clear signage, and bold colours for easy identification, making public transport more accessible and inclusive.	
	Mental Health Design Process Case Study Course Work October - November 2024 Designing an intuitive card manual and digital app to simplify self-assessment, reduce misdiagnosis, and guide timely mental health support.
